

Roslyn Technology Activity Week of May 4th

Want YOUR work to stand out?

Create a **cool** image out of words!

You can use this tool as a cover page for a project, or for anything really!

For this **optional** activity, you will make a word cloud, all about you!

From your internet browser, go to: **Wordart.com** and hit “create now”

1) Words

Click where it says, “Type in a new word”

Type in a new word about you on each new line (press return or enter after each new word) Here are some word ideas: your name, smart, funny, kind, cool, dancer, fruit-lover

Don't forget to delete the example words (word, cloud, and art) by clicking at the end of each one and backspacing the letters out

2) Shapes

Scroll through & choose a shape by double clicking on the thumbnail (turns blue when selected).

3) Font, Layout, Style

Play around with these, or just leave the default setting!

In Style, you can click “custom,” click on the colour palette to change and add more colours

4) Visualize

Scroll to the right of the screen & hit visualize (red button)

To save:

Tablet: You cannot save, unless you sign up (need parent permission), but you CAN take a screenshot!

Computer: click print (top right corner). Under Destination, select save as PDF. In more settings, options, uncheck headers & footers. Click save & make sure you save in a place where you can find again later.

Need help or want to share your work? Please have a parent email me: Jmarcus@emsb.qc.ca

Would love to hear from you =)
