

Hi Roslyn families,

As this isolation continues to keep us safe, my thoughts and prayers are with all of you. I miss you and working with you.

The school board has presented you with various activities including some science activities, some which we have already covered at school or were doing at the time of school closure.

Go ahead and do those if you so desire, but there are many different Science activities that are out there on the Internet and illustrated in videos on Youtube and other websites. I invite you to explore these and have fun doing them but make sure that you are safe while doing them.

When and if you do some, please take pictures and send them to me if you can. If you have any questions, please email me at either: [rpelland@emsb.qc.ca](mailto:rpelland@emsb.qc.ca) or [rogerpelland@yahoo.com](mailto:rogerpelland@yahoo.com) and I will answer you as soon as I can.

Here are some sites you can visit:

<https://www.youtube.com/watch?v=YXfTNcnF9rM>

In most of these, you will need parental supervision especially those involving heating things on the stove.

<https://www.youtube.com/watch?v=DzenPGjWtPk>

<https://www.youtube.com/watch?v=KOPJ4LiWl8w>

Many of these are messy so make sure that you do them in the sink, bathtub or over covered surfaces...have fun exploring. Some of the materials (like bleach) are chemicals that can be slightly dangerous, so you will want some supervision.

Have fun, be safe and hopefully we will see each other soon.

M. Roger
